My Dream Job

My name is Aziz. I'm 16 and I'm a student. I want to be a programmer because I'm good at computers.

My parents are doctors. A good doctor is kind and **careful**, but I'm not very **careful**. I'm **creative** and **hard-working**, so I think programming is a good job for me.

The **salary** is good, and the job is **safe** and **interesting**. I'd like to have a big **team** and a kind **boss**. I want to be **rich**, but **money** is not the most **important** thing.

What do you want to be? Why? What are you good at?
